# WASTE TREATMENT FACILITY INVENTORY

January 2024

**DISCLAIMER:** This compendium is made possible by the support of the American People through the United States Agency for International Development (USAID). ICF, the Cloudburst Group, and Kestrel Tellevate prepared this compendium under USAID's Environmental Compliance Support (ECOS) Contract, Contract Number GS00Q14OADU119, Order No. 7200AA18N00001, Contracting Officer's Representative Teresa Bernhard, Activity Specification Number GH-001, Activity Manager Dennis Durbin. ECOS is implemented by ICF and its subcontractors. The contents of this compendium are the sole responsibility of the authors and do not necessarily reflect the views of USAID or the United States Government.

# BACKGROUND

## Waste Treatment Facility Inventory (WTFI)

This compendium reflects the USAID Bureau for Global Health (GH) environmental compliance program effort, as of January 2024, to gather and centralize information on healthcare waste treatment facilities and technology types (e.g., incinerators, autoclaves, shredders) operating around the world to facilitate proper healthcare waste management and environmental compliance for USAID projects. USAID is currently incorporating these data into a mapping tool of healthcare waste treatment facilities for use by USAID program offices, missions, and implementing partners. This compendium contains information collected on healthcare waste treatment facilities and their location to date and is being released pending completion of the mapping tool.

Information on each waste treatment facility presented in the compendium includes location, treatment technology type, owner/operator contact information, processing capacity, type of waste accepted, and other information related to the facility. Note that some locations may have more than one waste treatment facility or technology type. This is indicated in the site summary information.

Information contained in this document is gathered from independent submissions to the GH environmental compliance program via the [Waste Treatment Facility Inventory \(WTFI\) Submission Sheet](#) that can be accessed by contacting [ghcompliancesupport@usaid.gov](mailto:ghcompliancesupport@usaid.gov). Additional waste treatment site information was collected via online research, direct outreach to owners/operators, and field visits. The WTFI reflects the best available information at the time of data collection. USAID does not guarantee the accuracy of the information presented. The site summaries contain the contact information for each listed facility. USAID recommends that potential users contact the facility directly to verify the operational status.

The GH environmental compliance program welcomes information on additional waste treatment sites. If you know of any healthcare waste treatment technology sites that could be used for USAID-funded projects, please help advance sound healthcare waste management practices by contacting the Bureau for Global Health environmental compliance program at [ghcompliancesupport@usaid.gov](mailto:ghcompliancesupport@usaid.gov).
